Referring Physician: **FAX:**

US OF THE BREAST BILATERAL

CLINICAL HISTORY: Patient has had surgery, left breast 9 o'clock and right breast 6 o'clock for cysts. Physician doesn't feel any masses now.

TECHNIQUE: US - Breast Bilateral

COMPARISON: None

FINDINGS:

The entire right breast was scanned in radial views.

Right breast at 9 o'clock position: circumscribed 0.9 x 0.9 x 0.9 cm cystic structure 2 cm from nipple.

The entire left breast was scanned in radial views.

Left breast showed some scarring which makes it difficult to evaluate. No definite cysts or masses are seen. Some small dilated ducts are noted.

IMPRESSION:

1. Right breast cyst BI-RADS category II.
2. Left breast scarring, no cysts or masses BI-RADS category I.

Thank you for your kind referral of this patient.
